

## Pageant website report for 2006

### Size and structure of the Pageant Website.

Date	Real* web pages	PDF and Word docs	Video clips
31 December 2004	67	4	12
31 December 2005	98	8	12
31 December 2006	154	9	12

\*pages available to general public through public links

There has been no significant change in the overall structure of the site since major restructuring took place late in 2004. We still aim to comply as closely as possible with the W3C specifications on accessibility. During 2006, we came close to exceeding the 100Mb maximum size permitted with our current web hosting package. To avoid the expense of moving to a higher package, all of the video clips and some selected pictures were moved to an auxiliary site, 'pageantextra', giving us an extra 50Mb of which we currently use 28Mb. There are plenty of free web spaces around, so we can repeat this process as required. At present we use about 54Mb on our main server, so there is still room for expansion of the core of the site. There is an ongoing process of moving pictures from older pages to keep within the package limits. Up to now, our policy has been to retain all old pages for reference. However, we may eventually need to review this policy.

### News Blog

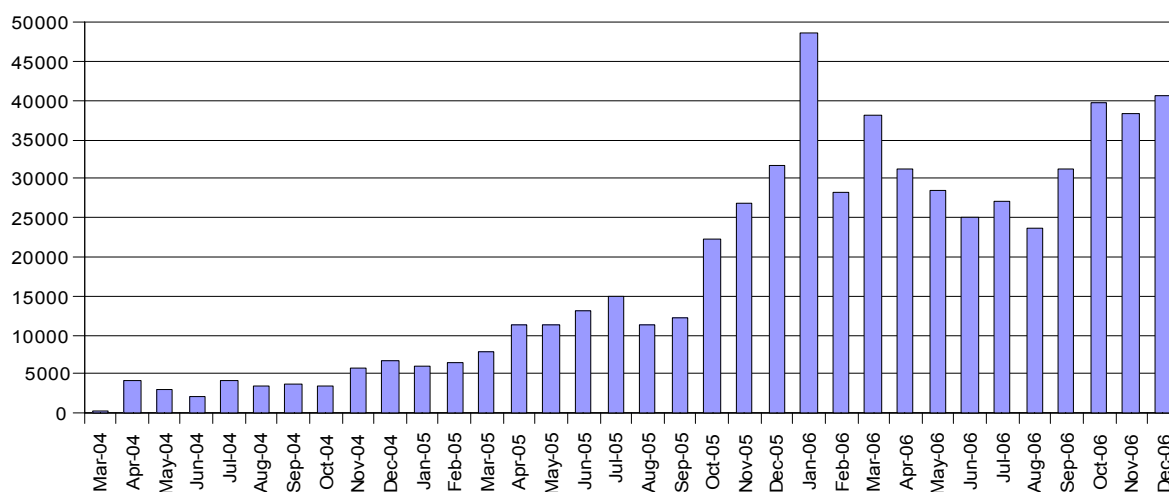

In August we launched a news blog at [pageant-news.blogspot.com](http://pageant-news.blogspot.com). This is intended to provide a faster service for breaking news, which can be updated by a team. So far it has simply mirrored our news page, but in 2007 we must encourage Pageant members with news items to join the blog team. Anyone interested please contact the webmaster.

### Search results

The Google search engine has an overall 70% share of all search engine usage – 77% in the UK – so there is little point in considering other search engines. The Pageant home page still has a Google PageRank of 4/10, and at present our home page is listed at No 1 using search terms 'gambia' 'education' and 'charity'. Our links page is listed at No 2.

### Traffic to the site

Pageant website hits, March 2004 to December 2006

The cumulative graph above shows a steady increase in traffic up to the end of 2005. There was then a fall followed by a recovery, making it difficult to predict trends for 2007.
